Question 2 Schema

Assumptions:
- A track is the act of composing a song into an audio recording
- Playlist_Tracks interact with audio recordings so that only audio recordings can be placed on a playlist
- Playlists only exist if there exists a user that creates a playlist
- Recordings are the number of times a song was recorded

Song		
Sid	Title	Authors

Tracks		
Id	Sid	Track_Number

Audio Recording					
Id	Title	Artist	Producer	Year	Recordings

Playlist_Tracks		
Id	Playlist_Name	User_id

Playlist		
User_id		Playlist_Name

User		
User_id	Playlist_Name	Name

Foreign keys:

Table attribute -> *table* attribute

User Playlist_Name -> *Playlist* Playlist_Name

Playlist User_id -> *User* User_id

Playlist_Tracks Playist_Name -> *Playist* Playlist_Name
Playlist_Tracks User_id -> *User* User_id
Playlist_Tracks Id -> *Recordings* Id

Tracks Id -> *Audio Recording* Id
Tracks Sid -> *Song* Sid
